PREVENTATIVE MAINTENANCE CHECKLIST - MACHINING CENTRE

CUSTOMER:

MACHINE MAKE:

MACHINE MODEL:

SERIAL NUMBER:

DATE:

OP	DESCRIPTION		COMMENTS / NOTES
GENERAL			
1	Check machine level, squareness of slideways, spindle alignment and runout. (By request only prior to visit)		
2	Check and adjust X,Y,Z-Axis Backlash compensation		
3	Check X,Y, Z Axis zero return. (adjust if required by customer)		
4	Check telescopic slide way guards and wipers		
5	Check tool unclamp stroke		
6	Check collet on end of draw bar		
7	Check ATC function, check fingers and pockets for wear. Check for play in tool lock release mechanism		
8	Check for bearing noise X, Y, Z Axis		
9	Check for bearing noise spindle		
10	Check for oil and air leaks		
11	Check linear rail wipers for wear		
12	Check Spindle Orientation		
13	Check Spindle Drive belt for wear and tention		
14	APC (if fitted) Check accuracy of APC and check clamping faces for wear		
ELECTRICAL			
1	Check main supply voltage		
2	Check for tightness of magnetic switches, relays, thermal relays, fuses, circuit breakers, servo connectors, terminal, etc.		
3	Check work lamp and indicator lamps		
4	Check push button and switches		
5	Check function of each emergency stop		
6	Check function of door locks and interlocks		
7	Check for dirt, oil in electrical control cabinets and advise how to clean if required		
8	Clean electrical cabinet filters and fans		
9	Check & clean electrical motor fans		
10	Check external cables for damage		
11	Replaced FANUC control battery		

LUBRICATION

1	Clean spindle lube tank, Change oil, clean/replace filters.		
2	Check Lubrication pump pressure		
3	Check that there is oil on the ballscrews and linear ways		
4	Check ATC box oil		

HYDRAULICS

1	(if Fitted APC) a. Clean hydraulic tank and filter, change oil b. Check hydraulic pressure settings		
2	SPINDLE OIL COOLER Checkoil and check air filters. Airblast clean the condenser cooling fans		

PNEUMATICS

1	Clean air/oil units and clean/replace filters		
2	Check and Adjust air/oil pressures if necessary		
3	Check for air blast at ATC		

COOLANT

1	Check filters		
2	Clean Grids		
3	Clean Tank		

BACK UP

1	Make Machine Back up		

THERMAL CHECK

1	Picture Machine when running Electrical Panel and Motors
